BASIC GAS UTILISATION PROGRAMME

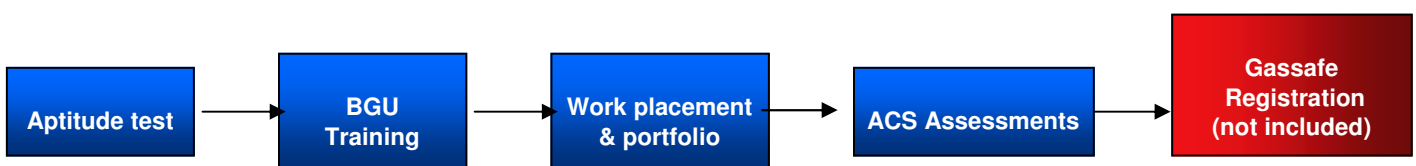

This certificated training course meets the entrance criteria for Applicants Categorisation 2 and 3. This course is aimed at **aspirant operatives** who wish to enter the domestic gas industry sector who have no previous relevant qualifications or formal proof of suitable work experience.

Duration

Can either be purchased on a weekly block basis or a full 4 week programme (both require additional work placement with a qualified gas engineer)

Content

- 4 weeks domestic gas utilisation programme at Connaught Academy. The training will cover all technical and underpinning knowledge requirements to allow the candidate to sit the ACS assessment at a later stage.
- 12 weeks approximate guide only (dependant on the individual's experience and on site training). They will need to build a portfolio of evidence demonstrating competence. They will be under supervision of registered gas engineers. This evidence will then be monitored and evaluated to make sure candidates have produced a sufficient range of varied work. On satisfactory completion of the portfolio candidates can apply for ACS assessments.
- **An additional 7 days assessment under the ACS scheme at Connaught Academy for ACS CCN1 Core Gas Safety plus 4 appliances is required to go forward for Gassafe registration. This is not included in the price below.**
